

01\ Air Tech Sole with TPU Skin The Base R&D department has:

- reduced the outsole thickness, the heaviest and most rigid part to less than a tenth of a millimetre layer thanks to TPU SKIN (exclusive Base patented technology).
- increased the comfort midsole thickness, the softest and lightest part, thanks to AIR TECH technology.

To obtain The most flexible and cushioned sole in the market: it reduces the fatigue at work.

- More elastic and flexible; High cushioning;
- More resistant to flexions; Higher grip; Lighter.

02\ Wide support area, with higher grip, that helps the natural foot rotation during walk and increases the stability of the entire body in the act of moving.
